Coverage of Improsys QMS Software

Introduction

Improsys is India based productivity and quality solution provider working in the domain of manufacturing, supply chain management and logistics sector. Improsys is headquartered in city of Pune, Maharashtra state is providing business services in the areas of business consulting, corporate training and software development with special focus on productivity, quality, delivery improvements resulting in bottom line improvement for clients and improvement in client customer satisfaction.

With more than 10 years of experience in serving varied satisfied clients ranging from SME to MNC organizations, Improsys client base is located in different parts of the globe. In multiple countries with multiple languages, Improsys team has vast experience in fine tuning system solutions for localised business and cultural requirements.

Team Improsys strives and works with business philosophy of:

"To consistently create value for our customer's stakeholders, by providing cost effective improvement solutions in systems which enable our customers to achieve excellence and sustainable competitive edge, continuous improvement of client organizational prosperity."

Technology

Technology plays an important role in the Improsys software. Softwares provided by Improsys is compatible and can be used on terminals such as laptop, mobile phones and HHT devices. Improsys Software is compatible with 1D, 2D, barcodes, RFID's and can be integrated with smart IoT devices such as Weighing Scales, Pressure Sensors, temperature Sensors, etc. enabling a competitive edge for our clients. Improsys invests in R&D activities to work on future technologies like AR/VR solutions, Smart Factory, etc. Improsys uses latest technologies like Microsoft Visual Studio, MS-SQL, Power Automate and Microsoft Power BI tools and offer software solutions on web and mobile platform.

Most of the Improsys software development, quality assurance, infrastructure and financial management activities are outsourced resulting in quality product and services at affordable and economical price tags. The core of Improsys business objective of value enhancement for client is achieved with expert involvement of on-role business consultants having wide experience of offering business and technology solutions

Support

Success of Improsys can be measured based on its satisfied customer base across different countries and business segments. Improsys could reach to top 10 service providers across the globe on foundation of customer satisfaction which is resulted from strong support processes which has resulted in high ranking on various customer satisfaction metrics.

Improsys support process comprises of mainly:

- a) **Pre-Sales Support** : Improsys appoints a dedicated business analyst at Pre-Sales stage who initially identifies and understands the business requirements of the client, to identify the gaps between client's requirements and the software scope provided by Improsys and proposes a solution to meet the business requirement of client.
- b) **Implementation Support**: Improsys works on PDCA methodology in implementation and handholding support.
- c) **Post Implementation Support**: Improsys deploys a dedicated support team who are available to provide support to client end users during live usage of the software. The team is available and provide the support through phone, SMS, Email and WhatsApp. Improsys also provides a dedicated support portal to the client post implementation wherein the end users can always log their suggestions, issues or requirements.

Systems Management Processes and International Standards

Improsys firmly believes in system-oriented working and the company philosophy, missions, business objectives, and quality objectives are defined resulting into appropriate operational, security and business continuity policies.

Standard Operating procedures for various business process such as Marketing, Sales, Operations, Admin, Finance, Support which are pre-defined and well documented.

Improsys is certified with Quality management standards ISO 9001:2015 and Information Security Management standards ISO 27001:2013. All systems and procedures are periodically audited for compliance of standards

Information Security Policy and Procedures

Improsys has a well-defined security policy in place. Based on principles of 5S+1 management, Improsys firmly believes in security of Information, Assets, and Improsys Third Party vendors and suppliers. Improsys has compliance with ISO 27001:2015 standard for security of information.

Security of Information

Improsys never shares or accesses customers data with any third-party without client's consent.

Change Management

Every change and new feature are governed by a change management policy to ensure all application changes are authorised before implementation into production. Our Software Development Life Cycle (SDLC) mandates adherence to secure coding guidelines, as well as screening of code changes for potential security issues with our code analyser tools, vulnerability scanners, and manual review processes.

Backup

We run incremental backups every day and weekly full backups of our programs and database in a physical hard disk. The hard disks are maintained in a lock and key arrangement with appropriate access control. Improsys uses iDrive Backup Services for the same. All backups are scheduled and tracked regularly. In case of a failure, a re-run is initiated and is fixed immediately. The integrity and validation checks of the full backups are done.

Information Security Policy and Procedures

Improsys has a well-defined security policy in place. Based on principles of 5S+1 management, Improsys firmly believes in security of Information, Assets, and Improsys Third Party vendors and suppliers.

Encryption

In transit: All customer data transmitted to our servers over public networks is protected using strong encryption protocols. We have enabled HTTPS to all our web connections and mandate all connections to our server use HTTPS protocols, for all connections including web access, API access, our mobile apps, and IMAP/POP/SMTP email client access. This tells all modern browsers to only connect to us over an encrypted connection, even if client types a URL to an insecure page at our site. Additionally, on the web we flag all our authentication cookies as secure.

Security of Assets

We control access to our resources (office, infrastructure and facilities), where accessing includes entry, and utilization, with the help of access cards. We provide employees, visitors with different access cards that only allow access strictly specific to the purpose of their entrance into our office. We maintain access logs to spot and address anomalies. We monitor all entry and exit movements throughout our premises through CCTV cameras deployed according to local regulations. Back-up footage is available up to a certain period, depending on the requirements for that location.

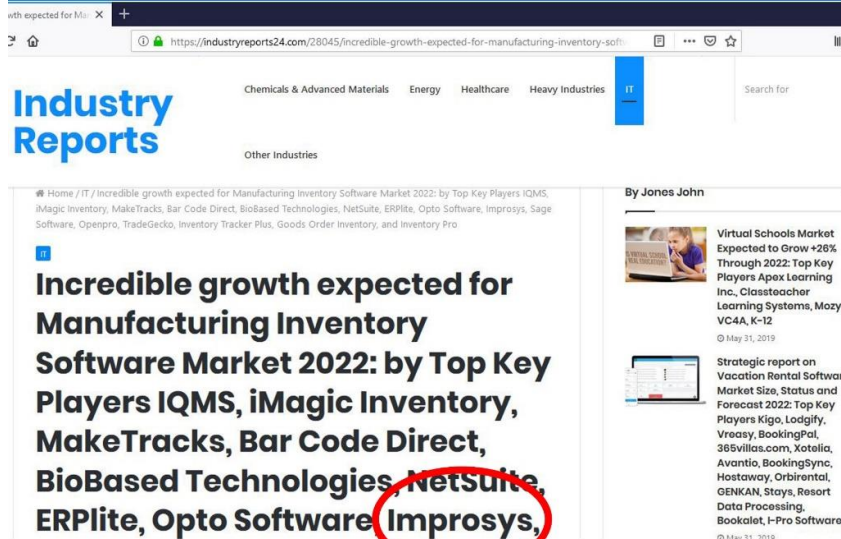

Quality Assurance

Quality is a continuous ongoing process which is key factor in measurement of customer satisfaction. We are committed to provide defect free software products conforming to customer requirements on time by complying with the requirements of our quality management system and continuously improving its effectiveness through management reviews of the quality objectives. Improsys believes in TQM (Total Quality Management) covering various sections of organization which include:

- a)Quality of Product
- b)Quality of Process
- c)Quality of People
- d)Quality of Assets
- e)Quality of Service
- f)Quality of Information
